

Our pathway to Net Zero by 2041

Over 460 residents, businesses, and organisations helped shape this plan, contributing almost 2,500 comments through a major public consultation.

80%

of respondents supported the actions proposed

We've made progress, but it is not enough!

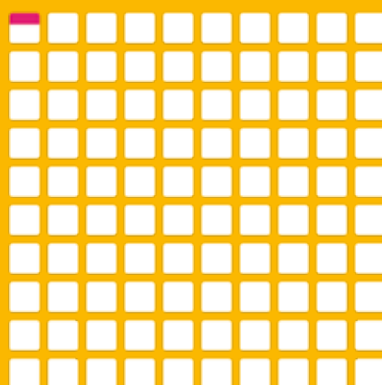

3.6%

Average emissions reduction since 2005

10.5%

Science-based target for emissions reduction

The council only directly controls a small

0.4%

share of local emissions

Our greatest strength is influence, helping residents, organisations, and businesses to work together

Our plan sets out 54 actions across OUR FIVE PILLARS with the biggest emissions and the biggest opportunities

- 1 Sustainable Transport
- 2 Resilient Residents
- 3 Socio-Environmental Responsible Business
- 4 Reduced Waste and Water Usage
- 5 Greater Carbon Absorption and Biodiversity

Fairness is at the heart of this plan, ensuring the transition supports vulnerable groups and delivers benefits for all

We can reach Net Zero by working together with government support, private investment, and community action
