Subject: Stopping-up. Princes Parade.

Ref. NATTRAN/SE/S247/3254

We totally OBJECT OBJECT OBJECT to this application. Sheer vandalism to this area and a historic monument.

Just shows that nothing is sacred and the council have no idea what a beautifully remarkable area this is. Never seen any of them in this area!!

Moving the road would destroy the nature of of this bit of countryside on our doorstep enjoyed by all. Building a huge ugly bank to accommodate the building of the road in order to make a wider promenade with a view back inland to potentially concrete luxury apartments instead of unique countryside.

The utterly unnecessary potential development of Princes Parade could still be done without digging up this lovely canal path for what infact is a wider front garden for the 150 houses. What a lovely drive along the Parade is, taking in the sea and canal views. What we would get instead, is a horrible view of the backs of these houses and a frightening all the wildlife to to boot, if they are still there of cause. This is a utterly horrible idea.

We live exactly opposite the canal bank so the traffic flow being transferred to the canal path, would create far more noise and pollution, lovely!!

Please take this email as a formal OBJECTION to this plan.

Mr and Mrs. Jaros
